Riga, Latvia

Profile

Always on the road to becoming a better software developer.

I have always enjoyed problem-solving. Breaking everything down to its components, understanding what they do and how I can make it all work or even improve it. That and the opportunity to create something useful is the exact reason why I have chosen software development as my career path.

Employment History

Software Developer at CODELEX, Riga

09/2022

I am an aspiring software developer facing and solving new challenges every day. Currently working on a rest API application in Spring Boot using TDD methodology.

Customer support specialist at Circle K Latvia, Riga

08/2017–07/2022

I was a support specialist for B2B and B2C services. My responsibilities included resolving customer queries, recommending solutions, and guiding product users through features and functionalities.

Customer support specialist at Transcom Worldwide Latvia, Riga

03/2014–07/2017

I was a support specialist working with B2C services. My responsibilities included resolving customer queries in a fast and friendly manner as well as guiding product users through features and functionalities.

Education

Secondary Education, Iecavas Secondary School, Iecava

09/2009–06/2012
